What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

 5 minutes

Write down any  
that address yo

Write down any ideas that come to mind that address your problem statement.

10 minute

prediction is easier to compute since we have raw data available freely on the internet

deep learning used for analysis

predicting the prices is done by getting data from different time periods

python is used for this prediction

history of prices can be used for reference

Data is crucial for training the model

visual representation can be done to get better idea

it is helpful for  
professionals  
and stock  
market traders

**TIP** You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

Take turns sharing sticky notes having

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.
